

AMENDMENTS TO THE CLAIMS

1-52. (Canceled)

53. (Currently Amended) A biopsy marker for marking a location cavity site from which a tissue sample has been removed during a breast biopsy, the marker comprising a woven body of a biodegradable polymer material, wherein the marker is detectable by remote ultrasound imaging when the marker is disposed ~~at the in a~~ biopsy location cavity created when the tissue has been removed, ~~and wherein the marker remains detectable for a first period of time after the woven body is introduced into the cavity site.~~

54. (Currently Amended) A method for marking a location cavity site from which a tissue sample has been removed during a breast biopsy comprising:
removing tissue to form a biopsy location cavity;
placing a biopsy marker comprising a woven body of a biodegradable polymer material in the biopsy location cavity; and
detecting the biopsy marker in the biopsy location cavity by remote ultrasound imaging after placing the biopsy marker in the biopsy location cavity;
~~wherein the marker remains detectable for a first period of time after the marker is introduced into the cavity.~~

Application No. 10/630,883
Amendment dated June 16, 2010
Reply to Office Action of March 16, 2010

55. (Currently Amended) The method for marking a location cavity-site from which a tissue sample has been removed during a breast biopsy in accordance with claim 54 wherein the woven body comprises a plurality of openings.

56. (Currently Amended) The method for marking a location cavity-site from which a tissue sample has been removed during a breast biopsy in accordance with claim 54 wherein the biopsy marker comprises a radiopaque material marker.

57. (Currently Amended) The method for marking a location cavity-site from which a tissue sample has been removed during a breast biopsy in accordance with claim 54 wherein the biopsy marker comprises a bioresorbable body containing a radiopaque material marker.

58. (Currently Amended) A biopsy marker for marking a location cavity-site from which a tissue sample has been removed during a breast biopsy, the biopsy marker comprising a woven body sized and shaped to fit within a breast biopsy location cavity, wherein the woven body is detectable by ultrasound imaging.

59. (Previously Presented) The biopsy marker of claim 58 wherein the woven body comprises a polymer.

60. (Previously Presented) The biopsy marker of claim 58 wherein the woven body comprises a plurality of openings.

Application No. 10/630,883
Amendment dated June 16, 2010
Reply to Office Action of March 16, 2010

61. (Previously Presented) The biopsy marker of claim 58 wherein the woven body comprises a biodegradable material.

62. (Currently Amended) The biopsy marker of claim 58 wherein the biopsy marker comprises a radiopaque material marker.

63. (Currently Amended) The biopsy marker of claim 58 wherein the biopsy marker comprises a bioresorbable body containing a radiopaque material marker.
